Kane School Recommended Reading:

Biel, Andrew, *Trail Guide to the Body*, Books of Discovery, Boulder, 2005

Trail Guide to the Body is the text used for Core Muscle Anatomy, which is the prerequisite for this and all other teacher training courses at the Kane School. This text provides a regional examination of the anatomy studied in this program specializing in locating musculature by palpation and superficial landmarks; as well as a practical reference for how these structures relate to movement.

Muscolino, Joseph, *The Muscular System Manual*, JEM Publications, Redding, 2002 *The Muscular System Manual* is a basic anatomical text and gives clear images and precise origins, insertions and actions for practically all muscles/muscle groups to be studied.

Calais-Germain, Blandine, *The Anatomy of Movement*. Eastland Press, Seattle, 1993 Kapit, Wynn, and L.M. Elson, *The Anatomy Coloring Book*, 2nd Edition. Harper Collins, New York, 1993 *Anatomy of Movement* and *The Anatomy Coloring Book* are valuable beginner resources. The anatomical illustrations are not realistic, but more stylized and graphic, which is useful for learning the basics of origin, insertion and action.

Netter, Frank, *The Atlas of Human Anatomy*, 2nd Edition. Novartis East Hanover NJ, 1997 *The Atlas of Human Anatomy* is a standard for students of anatomy involved in any field. The text includes beautiful color illustrations of musculature on its own as well as in relation to the surrounding bones, vessels and viscera.
